## SESSION SUMMARIES

AFTERNOON

Site 1 Coastal village in Greenland

.....very limited site contact, if any.....especially with stage 1 information

Site 2 Grand Canyon

.....Difficult time with this site....a reverse ideogram presented itself several times....along with it there was a feeling of confusion....again, stage 1 information seemed to be somewhat blocked.....stage 2's seemed to flow a little easier

## OVERALL:

There was a definite lack of visuals with today's sessions. This is unusual.....colors and shapes, <sup>usually</sup> present themselves easily... having a most difficult time with sounds.... this may be due to <sup>local</sup> area background noise....
